
The two big cost levers: medium price (x) and reactor scale (lines)
perfusion 25 m³ (scale-up wins)
TFF 5 m³ (demonstrated base)
ATF 2 m³ (scale-up stalls)
Pasitka measured ($0.63, TFF)
irreducible floor ~$13.2/kg
parity needs biomass ≤ $7/kg
medium range in the model
0.20 (company reports) to 1.00 (dearer than measured)
